

MARA SUPERIOR

Democracy/Come Together USA/ Mend/Repair, 2024
high-fired porcelain

A forever optimist, I remain hopeful that the majority of Americans will be able to sort through the semantics, scrambling of the truth and reality and make common sense political decisions, spread the word, and use their privilege to vote.

This piece is a visual representation of a divided democracy, literally being sewn back together with golden thread, an ancient Japanese Kintsugi Gold leaf repair, and porcelain buttons, in hopes of keeping it together.

A porcelain cut-out doll of, "Honest Abe Lincoln", is standing in front of the mended American Democracy with a billboard map of America advocating and advertising, "Vote 4 Democracy in 2024", a spokesman for the people from an American hero from the past.

Project 2025 is already here! Is anyone paying attention?

Why isn't the news media reporting on this?

We are voting for democracy over autocracy or monarchy, the rule of law, and our personal freedoms.

A rape of democracy by those who are supposed to be protecting it!

Six people on the Supreme Court are attempting to install a "Celebrity Clown King" to unravel our government creating something similar to Viktor Orban's, "Illiberal Democracy" in Hungary.

What we are facing is nothing short of the end of Western Greco-Roman Enlightenment = Western Civilization which has fostered Humanism the Renaissance and the underlying thought processes that inspired the ideals of the Early American founding fathers "liberal democracy", belief in the fact that, "all men are created equal" and that we are entitled to "life, liberty, and the pursuit of happiness!"

Wake up!! I know it's tough to pull away from your screen and escape.

Do your homework America. Pay attention before it's gone~
