Wake Up! America/Save Democracy 2024 high-fired porcelain

They say that the news is the first draft of history. I love World history, American history, Art history, and the history of Ceramics. Know and understand history so that you don't repeat mistakes = Sanity. I listen to the news in astonishment and wonder why people are allowing this to happen. Is anyone paying attention?

We are all so distracted with our own screen time. It is so easy to escape the chaos.

I have felt compelled to make this series about saving "American Democracy"~ A Porcelain Wake Up Call to my fellow Americans to Vote Blue in 2024. In my effort to understand what is going on and how this all could've come to be, I assembled a group of "commentary plates", describing how and why the elements of the puzzle came together, surrounding the polarized "Red" and "Blue" map of the United States. I have put a heart and a four-leaf clover on the map, wishing my beloved country good luck and hoping for our better angels to do their best!

With this current Supreme Court ruling giving Trump imperial immunity as well as the Dobbs decision, we can no longer rely on perceived guard rails of justice. The Supreme Court has a political bias. A king above the Law! Not since 1776 when we celebrated our independence and separation from England and King George III has anything like this occurred. This is completely un-American! Whether Democratic, Republican, or independent, everyone should be alarmed by this decision overturning our three branches of government, checks, and balances.

"Now that The Imperial Supreme Court has granted total immunity to an Imperial President~With fear for our democracy, I descent."

— Justice Sotomayor, 2024

John Polak Photography

Democracies need an educated electorate to make educated decisions, enjoy the privilege of being able to vote, trust in its institutions, and have a free press to function truthfully.

We have been completely upended.

We the people discuss, debate, compromise, and vote to accomplish anything and to have government function.

Whatever justifiable concerns you might have about being uninspired to vote~ stop whining! This is not the race to sit out!

The only way to stop this court is to win back the Senate, take back the House, and hold the Presidency. All we can do is vote blue, including every down-ballot candidate.

Our democracy is literally at stake.

We are voting for democracy over autocracy or monarchy, rule of law and our personal freedoms, a rape of democracy, by those who are supposed to protect it~shame on you Supreme Court.

Joe Biden represents experience and decency. BIDEN = TIME To figure things out.

The alternative is unimaginable a celebrity clown king .
